6. Bibliografie:

The effect of 835.62 MHz FDMA or 847.74 MHz CDMA modulated radiofrequency radiation on the induction of micronuclei in C3H 10T(1/2) cells.

Prenatal exposure to 900 MHz, cell-phone electromagnetic fields had no effect on operant-behavior performances of adult rats.

Chia SE, Chia HP, Tan JS, 2000.

Cytogenetic damage in human lymphocytes following GMSK phase modulated microwave exposure.

De GSM, Veilig mobiel telefoneren?
http://www.health.fgov.be/CSH_HGR/Nederlands/Brochures/De_GSM.htm#Energie

GSM radiocellular telephones do not disturb the secretion of antepituitary hormones in humans.

Evaluation in humans of the effects of radiocellular telephones on the circadian patterns of melatonin secretion, a chronobiological rhythm marker.

Dubreuil D, Jay T, Edeline JM, 2002.
Does head-only exposure to GSM-900 electromagnetic fields affect the performance of rats in spatial learning tasks?

The acute effects of exposure to the electromagnetic field emitted by mobile phones on human attention.

Food and Drug Administration
Effects of increased air gap on the in vitro interaction of wireless phones with cardiac pacemakers.

Use of cellular telephones and the risk for brain tumours: A case-control study.

Interference with cardiac pacemakers by cellular telephones.

Hypersensitivity symptoms associated with exposure to cellular telephones: no causal link.
Bioelectromagnetics, 23(4):264-70.

Acute effects of using a mobile phone on CNS functions.

Cellular-telephone use and brain tumors.

Guidelines for limiting exposure to time-varying electric, magnetic and electromagnetic fields.
Health Physics, 74:494-522.

Cellular telephones and cancer—a nationwide cohort study in Denmark.
Non-thermal activation of the hsp27/p38MAPK stress pathway by mobile phone
radiation in human endothelial cells: Molecular mechanisms for cancer- and blood-brain
barrier-related effects.
Differentiation, 70:120-129.

Cytogenetic effects of 900 MHz (GSM) microwaves on human lymphocytes.
Bioelectromagnetics, 22(2):91-6.

Mann SM, Cooper TG, et al.: Exposure to radio waves near mobile phone base stations.
Natl Radiol Protec Board (UK), June 2000.

Electromagnetic Fields and Human Health. Cellular Phone Antennas (Mobile Phone Base
Stations) and Human Health, 2002.

Muscat JE, Malkin MG, Thompson S, Shore RE, Stellman SD, McRee D, Neugut AI,
Handheld cellular telephone use and risk of brain cancer.
JAMA, 284(23):3001-7.

Effects of the electromagnetic field of mobile telephones on hearing.

Local vasodilator response to mobile phones.
Laryngoscope, 111(1): 159-62.

Radio-frequency electromagnetic fields associated with cellular-radio cell-site antennas.

No effects of pulsed radio frequency electromagnetic fields on melatonin, cortisol, and
selected markers of the immune system in man.

Low-level exposure to pulsed 900 MHz microwave radiation does not cause deficits in
the performance of a spatial learning task in mice.

Thansandote A, Gajda GB et al., 1999.
Radiofrequency radiation in five Vancouver schools: exposure standards not exceeded.
